What WOSB and EDWOSB Mean & Why They Matter

The bottom line: The federal government is required by law to award at least 5% of all federal contracting dollars to Women-Owned Small Businesses. That's approximately \$30+ billion per year. WOSB and EDWOSB certifications are your ticket to accessing that money through set-aside contracts where only certified women-owned businesses can compete.

WOSB — WOMEN-OWNED SMALL BUSINESS

What it means: Your business is at least 51% owned and controlled by one or more women who are U.S. citizens.

What it unlocks: Access to WOSB set-aside contracts in industries where women are underrepresented.

EDWOSB — ECONOMICALLY DISADVANTAGED WOSB

What it means: You meet all WOSB requirements AND the woman owner(s) demonstrate economic disadvantage.

What it unlocks: Access to BOTH EDWOSB and WOSB set-aside contracts — a larger pool of opportunities.

Why This Certification Changes Everything

Benefit	Details
Reduced Competition	Set-aside contracts limit competition to only certified WOSBs/EDWOSBs. Instead of competing against thousands, you might compete against a handful.
Sole Source Authority	Contracting officers can award contracts up to \$7 million (manufacturing) or \$4.5 million (all other) directly to a WOSB/EDWOSB without full competition.
Government Goal	Federal agencies are measured on meeting the 5% WOSB contracting goal. They WANT to find you and give you contracts.

Credibility

SBA certification is government-verified. It signals to prime contractors and agencies that your business is legitimate and vetted.

Subcontracting Opportunities

Large prime contractors need WOSB subcontractors to meet their own small business subcontracting goals.

Industries Eligible for WOSB Set-Asides

WOSB set-aside contracts are available in industries where women are **substantially underrepresented**. EDWOSB set-asides are available in industries where women are **underrepresented**. The SBA maintains the official list of eligible NAICS codes. Key industries include:

- Construction and specialty trades
- Manufacturing
- Information technology
- Professional, scientific, and technical services
- Administrative and support services
- Transportation and warehousing
- And many more — check sba.gov/wosb for the full NAICS code list

Eligibility Requirements

WOSB Eligibility — All of the Following Must Be True

- ☐ The business is a small business according to SBA size standards for its primary NAICS code
- ☐ The business is at least 51% unconditionally and directly owned by one or more women who are U.S. citizens
- ☐ The management and daily operations are controlled by one or more women who own it
- ☐ The woman/women who own and control the business hold the highest officer position (CEO, President, etc.)
- ☐ The woman/women owners have managerial experience to run the business
- ☐ The woman/women owners work full-time during normal business hours
- ☐ No other person (non-qualifying) has the ability to control the business operations or make decisions

⚠ **Control Means Real Control:** The SBA looks beyond paper ownership. If your husband, business partner, or investor can overrule your business decisions, sign checks without your approval, or control operations — you may not qualify. The qualifying woman must have actual, daily, unconditional control.

Additional EDWOSB Requirements — Economic Disadvantage

To qualify as economically disadvantaged, the qualifying woman owner(s) must demonstrate that their ability to compete in the free enterprise system has been impaired due to diminished capital and credit opportunities compared to others in the same industry who are not socially disadvantaged.

ECONOMIC DISADVANTAGE CRITERIA

Factor	Threshold
Personal Net Worth	Must be less than \$850,000 (excluding ownership in the applicant business and primary residence equity)

Adjusted Gross Income

3-year average must not exceed \$400,000

Total Assets

Fair market value must not exceed \$6.5 million (including primary residence and business)

💡 **Pro Tip:** Don't self-disqualify. Many women assume they don't qualify for EDWOSB because they own a home or have some savings. The thresholds are more generous than people think — \$850K net worth EXCLUDES your business equity and primary home equity. If you're a typical small business owner, you likely qualify.

Business Structure Considerations

Structure	Ownership Requirement
Sole Proprietorship	Must be owned by a woman U.S. citizen
LLC	Women must own at least 51% of membership interests AND be managing members
Partnership	Women must own at least 51% of partnership interests
Corporation	Women must own at least 51% of all classes of stock AND hold highest officer position and board control
S-Corp	Same as corporation

3

Documents You Need to Gather

Before you start the application, gather ALL of these documents. Having everything ready will prevent delays and back-and-forth with the SBA. Organize them in a single folder (digital or physical).

Business Documents

- ☐ **Articles of Organization/Incorporation** — Filed with your state (shows ownership structure)
- ☐ **Operating Agreement (LLC) or Bylaws (Corp)** — Must show woman owner has control and 51%+ ownership
- ☐ **Business licenses** — State and local business licenses/permits
- ☐ **EIN letter from IRS** — IRS confirmation of your Employer Identification Number
- ☐ **SAM.gov registration** — Must be active and current (see Section 4)
- ☐ **UEI number** — Unique Entity Identifier from SAM.gov
- ☐ **CAGE code** — Assigned through SAM.gov registration
- ☐ **Business bank statements** — Most recent 3 months showing the business is active
- ☐ **Business tax returns** — Last 3 years (or since inception if newer)
- ☐ **Certificate of Good Standing** — From your state's Secretary of State
- ☐ **Proof of business address** — Lease, utility bill, or mortgage statement
- ☐ **Organization chart** — Showing who reports to whom and who makes decisions
- ☐ **Resumes of all owners and key employees**

Personal Documents (for the qualifying woman owner)

- ☐ **Government-issued photo ID** — Driver's license or passport
- ☐ **Proof of U.S. citizenship** — Birth certificate, passport, or naturalization certificate
- ☐ **Personal tax returns** — Last 3 years (all pages, all schedules)

- ☐ **Personal financial statement (SBA Form 413)** — Lists all assets, liabilities, and net worth
- ☐ **Resume or CV** — Demonstrating relevant experience to manage the business

Additional Documents for EDWOSB Only

- ☐ **Narrative statement of economic disadvantage** — Explain how economic factors have limited your business opportunities (1-2 pages)
- ☐ **Personal financial statement with detailed asset/liability breakdown**
- ☐ **Documentation of any outstanding loans, liens, or judgments**
- ☐ **Evidence of limited access to capital or credit** (loan denials, high-interest rates, limited credit lines)

Document Format Tips:

- Save everything as PDF
- Name files clearly: "Articles-of-Organization.pdf" not "scan001.pdf"
- Make sure documents are legible — no blurry scans
- Ensure all pages are included (don't skip Schedule C or K-1)
- Check that signatures are visible on all signed documents

Document Checklist Summary

Category	WOSB	EDWOSB
Articles of Organization/Incorporation	Required	Required
Operating Agreement/Bylaws	Required	Required
Business licenses	Required	Required
EIN letter	Required	Required
Business tax returns (3 years)	Required	Required
Personal tax returns (3 years)	Required	Required
SBA Form 413	Required	Required

Proof of citizenship	Required	Required
Economic disadvantage narrative	—	Required
Evidence of limited capital access	—	Required

4

SAM.gov Registration Walkthrough

SAM.gov (System for Award Management) registration is **required before** you can apply for WOSB/EDWOSB certification. It's also required to bid on any federal contract. This is free — never pay anyone to register you on SAM.gov.

⚠ **Scam Alert:** You will receive emails, letters, and phone calls from companies claiming you need to pay \$300-\$800+ to register on SAM.gov. This is a SCAM. SAM.gov registration is 100% free. The only official website is sam.gov.

Step-by-Step SAM.gov Registration

1 Create a Login.gov Account

Go to login.gov and create an account. This is the federal government's single sign-on system. You'll use the same Login.gov credentials for SAM.gov, certify.sba.gov, and other federal systems. Use your business email address. Set up multi-factor authentication (phone or authentication app).

2 Go to SAM.gov and Start Entity Registration

Log in at sam.gov with your Login.gov credentials. Click "Get Started" under Entity Registration. Select "I want to Register my entity to do business with the U.S. Government."

3 Validate Your Entity

You'll need your EIN (Employer Identification Number) and legal business name exactly as it appears on your IRS documentation. SAM.gov will validate your entity with the IRS — this can take 24-48 hours. If it fails, double-check that your legal name and EIN match your IRS records exactly.

4 Get Your UEI (Unique Entity Identifier)

As part of SAM.gov registration, you'll automatically receive a UEI. This replaced the old DUNS number. Write this down — you'll need it for almost everything in government contracting.

5 Complete Your Entity Registration

Fill out all sections: Core Data (legal business name, address, entity type), Assertions (business types, including WOSB if applicable, SBA-certified HUBZone, etc.), Representations and Certifications (FAR and DFARS reps and certs), and Points of Contact (government and electronic business POCs). This section is long. Budget 2-3 hours to complete it carefully.

6 Submit and Wait for Activation

After submission, SAM.gov will process your registration. This typically takes 7-10 business days. You'll receive an email when your registration is active. Your CAGE code will be assigned during this process.

 **Critical Reminder:** SAM.gov registration expires every 365 days. Set a calendar reminder to renew 30 days before expiration. If your registration lapses, you cannot bid on or receive federal contracts, and your WOSB certification may be affected.

Getting Your UEI and CAGE Code

UEI — Unique Entity Identifier

The UEI is a 12-character alphanumeric identifier assigned to your entity through SAM.gov. It replaced the DUNS number (which was issued by Dun & Bradstreet) in April 2022.

Detail	Info
Where to get it	Automatically assigned during SAM.gov registration
Cost	Free
Format	12 characters (letters and numbers)
Where you'll use it	SAM.gov, certify.sba.gov, grant applications, contract bids, subcontractor registrations
Can you get it without full SAM registration?	Yes — you can request a UEI only (for grants, etc.) without completing full entity registration

CAGE Code — Commercial and Government Entity Code

The CAGE code is a 5-character identifier assigned by the Department of Defense's Defense Logistics Agency (DLA). It identifies companies doing or wanting to do business with the federal government.

Detail	Info
Where to get it	Automatically assigned during SAM.gov registration (or can request separately at cage.dla.mil)
Cost	Free
Format	5 characters (letters and numbers)
Processing time	Usually assigned within the SAM.gov registration timeline (7-10 days)
Where you'll use it	Federal contract bids, subcontracting agreements, capability statements

 **Keep These Numbers Handy:** Once you have your UEI and CAGE code, add them to your capability statement, email signature block, and a document you can easily reference. You'll be asked for these numbers constantly in government contracting.

Your Federal Registration Checklist

- ☐ Login.gov account created with business email
- ☐ SAM.gov entity registration completed and ACTIVE
- ☐ UEI number received and recorded: _____
- ☐ CAGE code received and recorded: _____
- ☐ SAM.gov renewal date set in calendar: _____
- ☐ NAICS codes selected and entered in SAM.gov profile
- ☐ Business types/certifications selected in SAM.gov Assertions
- ☐ All Representations and Certifications completed
- ☐ Points of Contact information is current
- ☐ Banking information entered (for direct deposit payments)

6

SBA Certification Process (certify.sba.gov)

This is the main event — actually applying for your WOSB or EDWOSB certification through the SBA. As of 2023, the SBA is the sole certifying authority for WOSB/EDWOSB (third-party certifiers like WBENC and NWBOC are no longer accepted for federal contracting set-asides).

Step-by-Step Application Process

1 Go to certify.sba.gov

Log in with your Login.gov credentials (same ones you used for SAM.gov). If this is your first time, you'll need to connect your SAM.gov entity to your certify.sba.gov profile using your UEI.

2 Select Your Certification Type

Choose WOSB or EDWOSB. If you think you qualify for EDWOSB, apply for that — it automatically includes WOSB eligibility. You get access to BOTH pools of contracts.

3 Complete the Online Questionnaire

The application walks you through questions about business ownership, management, control, operations, and (for EDWOSB) economic disadvantage. Answer honestly and thoroughly. Each answer may trigger follow-up questions or document upload requirements.

4 Upload Required Documents

Upload all the documents from your prepared folder (Section 3 of this guide). The system will tell you which documents are required based on your answers. Upload them as clear, complete PDFs. Label them clearly.

5 Review and Submit

Review every section before submitting. Once submitted, you'll receive a confirmation email. The SBA will review your application and may request additional information.

6 Respond to Any SBA Requests Promptly

The SBA may come back with questions or requests for additional documents. You typically have 5-10 business days to respond. Delayed responses = delayed certification. Check your email daily during review.

7 Receive Your Decision

If approved, congratulations! Your certification will be reflected in SAM.gov and you can begin competing for set-aside contracts. If denied, you'll receive a reason and can reapply after addressing the issues.

After Certification

- ☐ Update your SAM.gov profile to reflect certification
- ☐ Update your capability statement with WOSB/EDWOSB designation
- ☐ Update your website and marketing materials
- ☐ Begin searching for set-aside contracts (see Section 9)
- ☐ Remember: certification must be renewed — track your expiration date
- ☐ Report any changes in ownership, control, or economic status to the SBA

7

NAICS Code Selection Guide

NAICS (North American Industry Classification System) codes classify your business by industry. Choosing the right codes is critical because they determine which contracts you can bid on, your small business size standard, and whether your industry is eligible for WOSB/EDWOSB set-asides.

How NAICS Codes Work

Level	Digits	Example
Sector	2 digits	54 — Professional, Scientific, and Technical Services
Subsector	3 digits	541 — Professional, Scientific, and Technical Services
Industry Group	4 digits	5416 — Management, Scientific, and Technical Consulting
Industry	5 digits	54161 — Management Consulting Services
National Industry	6 digits	541611 — Administrative Management and General Management Consulting

How to Choose Your NAICS Codes

1. **Start with your primary service.** What does your business do MOST? That's your primary NAICS code. This determines your size standard.
2. **Add secondary codes.** What else can your business do? You can list multiple NAICS codes in SAM.gov.
3. **Check size standards.** Each NAICS code has a size standard (revenue or employee count). Make sure you qualify as "small" under your primary code.
4. **Check WOSB eligibility.** Not all NAICS codes are eligible for WOSB/EDWOSB set-asides. Check the SBA's eligible industries list.
5. **Look at what agencies buy.** Search SAM.gov for contracts in your field and note which NAICS codes are used. Use those same codes.

Common NAICS Codes for Consulting & Professional Services

NAICS Code	Description	Size Standard
541611	Administrative Management and General Management Consulting	\$24.5M revenue
541612	Human Resources Consulting Services	\$19M revenue
541613	Marketing Consulting Services	\$19M revenue
541614	Process, Physical Distribution, and Logistics Consulting	\$19M revenue
541618	Other Management Consulting Services	\$19M revenue
541690	Other Scientific and Technical Consulting Services	\$19M revenue
541990	All Other Professional, Scientific, and Technical Services	\$19M revenue
611430	Professional and Management Development Training	\$15M revenue
611710	Educational Support Services	\$19M revenue
561110	Office Administrative Services	\$12.5M revenue

Pro Tip: Don't limit yourself to one or two NAICS codes. List every service you can legitimately provide. When a contracting officer searches for businesses, they filter by NAICS code. The more codes you're registered under, the more opportunities you'll appear in. But only list codes you can actually perform — misrepresentation can result in debarment.

State-Level Certifications (HUB, WBE, DBE)

Federal WOSB/EDWOSB certification gets you into federal contracts. But there's a whole world of STATE and LOCAL government contracts that require separate certifications. These are just as valuable and often have less competition.

Texas HUB (Historically Underutilized Business)

Detail	Info
What it is	Texas state certification for minority, women-owned, and disadvantaged businesses
Who issues it	Texas Comptroller of Public Accounts
Cost	Free
What it unlocks	State of Texas contracts — Texas agencies have HUB participation goals (typically 11-23% depending on category)
Where to apply	comptroller.texas.gov/purchasing/vendor/hub/
Processing time	Approximately 90 days

WBE (Women's Business Enterprise) — City/Regional Level

Detail	Info
What it is	Certification that your business is owned and operated by women — at the city or regional level
Who issues it	City certification offices (e.g., City of Austin Small & Minority Business Resources)
What it unlocks	City and county contracts, prime contractor subcontracting requirements
Cost	Usually free

DBE (Disadvantaged Business Enterprise)

Detail	Info
What it is	U.S. DOT certification for businesses owned by socially and economically disadvantaged individuals
What it unlocks	Transportation-related contracts (highway, transit, airport) funded by DOT
Who issues it	State DOT or unified certification programs
Texas application	txdot.gov (Civil Rights Division)
Personal net worth limit	\$1.32 million (excluding primary residence and business)

State Certification Checklist

- ☐ Texas HUB certification applied for / received
- ☐ Texas CMBL (Centralized Master Bidders List) registration completed
- ☐ City of Austin WBE certification applied for / received
- ☐ City of Austin DBE certification applied for / received (if applicable)
- ☐ WBENC national WBE certification considered (valuable for corporate contracts)
- ☐ All certifications tracked with expiration dates in calendar
- ☐ Capability statement updated with all certification logos and numbers

 **Stack Your Certifications:** The more certifications you hold, the more valuable you are — both to government agencies trying to meet goals AND to prime contractors needing diverse subcontractors. A business that is WOSB + EDWOSB + HUB + WBE + DBE can count toward multiple goals simultaneously, making you a highly attractive partner.

How to Find WOSB Set-Aside Contracts

Congratulations — you're certified. Now it's time to find and win contracts. Here's where to look and how to set up a system so opportunities come to you.

Where to Find Federal Opportunities

Platform	URL	What to Search For
SAM.gov (Contract Opportunities)	sam.gov/search	Filter by "Set-Aside" → WOSB or EDWOSB. Filter by your NAICS codes. Set up saved searches with email alerts.
SBA Dynamic Small Business Search (DSBS)	dsbs.sba.gov	Register your profile so contracting officers can find YOU. This is the database they search.
Agency Forecast Tools	Various (each agency)	Many agencies publish procurement forecasts 6-12 months in advance. Search "[agency name] procurement forecast."
GovWin (Deltek)	govwin.com	Premium tool with early intel on upcoming contracts. Has a free tier.
USASpending.gov	usaspending.gov	Research what agencies spend money on and who's winning contracts in your NAICS codes.

Where to Find State & Local Opportunities (Texas)

Platform	URL
Texas ESBD (Electronic State Business Daily)	esbd.cpa.state.tx.us
Texas SmartBuy (state purchasing)	comptroller.texas.gov/purchasing/
City of Austin Procurement (Bonfire)	austintexas.bonfirehub.com

Travis County Purchasing	traviscountytexas.gov/purchasing
Capital Metro (transit)	capmetro.org/procurement

Setting Up Your Opportunity Pipeline

- ☐ Create saved searches on SAM.gov with your NAICS codes and set-aside type
- ☐ Enable email notifications for new matching opportunities
- ☐ Check SAM.gov contract opportunities at least 3 times per week
- ☐ Register on ESBD and set up email alerts for your categories
- ☐ Register on Bonfire for City of Austin opportunities
- ☐ Follow target agencies on social media for procurement announcements
- ☐ Attend agency industry days and pre-solicitation conferences
- ☐ Join PTAC (Procurement Technical Assistance Center) — free counseling for government contractors (see aptac-us.org)
- ☐ Connect with prime contractors who need WOSB subcontractors
- ☐ Track all opportunities in a spreadsheet with due dates, status, and contact info

Pro Tip: Don't just respond to solicitations. Build relationships with contracting officers BEFORE opportunities are posted. Attend industry days, request capability briefings, and introduce yourself. By the time an RFP is posted, the winning company often already has a relationship with the agency.

Common Mistakes That Delay Approval

I've been through this process myself and helped others through it. These are the mistakes I see most often — avoid them and you'll save weeks or months of delays.

#	Mistake	How to Avoid It
1	Operating Agreement doesn't match application	Before applying, review your Operating Agreement or Bylaws. Make sure the woman owner is listed as 51%+ owner AND as managing member/CEO with full control. If it's unclear, amend the document first.
2	SAM.gov registration expired or incomplete	Complete SAM.gov registration FIRST and make sure it's active. The WOSB application pulls data from SAM — if it's not active, you can't proceed.
3	Missing or incomplete tax returns	Upload ALL pages of tax returns, including all schedules and K-1s. Missing pages trigger a request for additional information and delays.
4	Business name mismatch	Your business name must match EXACTLY across IRS records, SAM.gov, state filings, and the WOSB application. Even "LLC" vs. "L.L.C." can cause issues.
5	Not demonstrating actual control	The SBA looks for evidence that the woman owner makes real decisions. If your Operating Agreement gives veto power to a non-qualifying person, or if the woman owner doesn't work full-time in the business, this is a problem.
6	Slow response to SBA requests	When the SBA asks for additional information, respond within 3-5 business days. Delayed responses are the #1 reason applications take months instead of weeks.
7	Not having a business bank account	The business must have its own bank account, separate from personal accounts. Open one before applying.
8	Incomplete SBA Form 413	Fill out EVERY field on the Personal Financial Statement. Blank fields are not accepted — enter \$0 if the value is zero.

9	Forgetting to prove citizenship	You must upload proof of U.S. citizenship. A driver's license is NOT proof of citizenship. Use a passport, birth certificate, or naturalization certificate.
10	Applying for the wrong certification	If you qualify for EDWOSB, apply for EDWOSB (not just WOSB). EDWOSB gives you access to both EDWOSB AND WOSB set-asides — a bigger pool of opportunities.

Timeline Expectations & Next Steps

Realistic Timeline

Phase	Time Estimate	Notes
Gather all documents	1-2 weeks	Longer if you need to amend Operating Agreement or get a Certificate of Good Standing
SAM.gov registration (if not already done)	7-10 business days	Start this FIRST — it's a prerequisite
Complete certify.sba.gov application	3-5 hours	With documents already prepared, this goes faster
SBA review	30-90 business days	Depends on volume, completeness of application, and whether additional info is requested
Respond to SBA requests	As needed	Respond within 3-5 business days to avoid delays
Total estimated time	2-4 months	From start to certification, assuming no major issues

Your Action Plan

1 This Week: Create your document folder and start gathering everything from the checklist in Section 3. Order a Certificate of Good Standing from your state.

2 Week 2: Complete or verify your SAM.gov registration. If you don't have one, start the process now. If you have one, make sure it's active and up to date.

3 Week 2-3: Review your Operating Agreement/Bylaws. Does it clearly show 51%+ woman ownership and control? If not, work with an attorney to amend it.

4 Week 3: Complete the certify.sba.gov application. Upload all documents. Submit.

5 Weeks 3-12: Check email daily for SBA requests. Respond immediately. While waiting, start working on state-level certifications (HUB, WBE).

6 Upon Certification: Update SAM.gov, update your capability statement, set up contract search alerts, and start bidding!

 **While You Wait:** Don't sit idle during the review period. Use this time to: build your capability statement, research target agencies, attend industry days, connect with PTAC counselors, and register for state/local certifications. When your WOSB certification comes through, you want to be ready to bid immediately.

About the Author

April Lewis, CEO

A.S. Business Consulting LLC

April Lewis is a certified SBA WOSB and EDWOSB business owner who has navigated the entire certification process herself — from SAM.gov registration to federal contract competition. As the CEO of A.S. Business Consulting LLC, she brings real-world experience to this guide, not theory.

April's company holds federal certifications including UEI EFRHNQ78Z228, CAGE Code 0JQA8, and SBA WOSB/EDWOSB. At the state level, she is Texas HUB Certified and registered on the CMBL. At the city level, she holds City of Austin HUB, WBE, and DBE certifications. She knows what it takes because she's done it.

Beyond government contracting certifications, April specializes in leadership development, workforce consulting, HR consulting, cultural sensitivity and DEI training, executive coaching, workplace safety (OSHA Certified), emergency management (FEMA Certified), and business consulting across multiple industries.

Education: AA in Business, AA in Criminal Justice, AA in Psychology

Certifications: OSHA Certified, FEMA Certified, Google Developer, Licensed Insurance Agent (TX), Notary Public, Loan Signing Agent, Process Server, Licensed Cosmetologist, Ordained Minister

Need More Help?

Getting certified is just the first step. If you need help with your capability statement, contract bid preparation, or a full government contracting strategy, A.S. Business Consulting LLC offers one-on-one consulting packages tailored to your business.
